

kaleidescape

TWENTY YEARS *of* PREMIUM HOME CINEMA

REMOTES

Kaleidescape integrates with control systems and universal remote controls for a customizable automation experience. We also offer a Kaleidescape remote as well as a special child remote, which integrates with Kaleidescape's proprietary child interface.

Kaleidescape remote

Child remote

A Kaleidescape remote control is included with every system purchase. The Kaleidescape remote allows you to easily navigate Kaleidescape menus and switch between the cover shuffle, list view, or collections view. You can play movies, favorite scenes, or songs with a few button taps. The Kaleidescape remote helps guide you through initial system setup and serves as a backup for your primary control system.

The Kaleidescape child remote was made specifically for young children in mind. Easy enough for a 3-year-old to use, the child remote brings up the child collection on any Kaleidescape system. Parents simply curate the child collection with any content they feel is appropriate for their children and let their little one do the rest. Large, color-coded buttons allow children to navigate the simplified covers view with ease and go straight to the show they want to watch.
