- Support for high dynamic range (HDR)
- Compact form factor (2 players fit in 1 rack unit)
- Superb upscaling of Blu-ray and DVD quality content to 4K resolution
- Seamless switching between 4K Ultra HD, 4K upscaled Blu-ray quality or DVD quality content, and the 4K onscreen user interface
- Lossless multichannel audio, including Dolby Atmos, Dolby TrueHD, DTS:X, and DTS-HD Master Audio
- Strato C can play back from Terra movie servers and Strato S movie players
- Compatible with popular control systems and universal remotes
- Custom rack mount and wall mount hardware is available (sold separately)

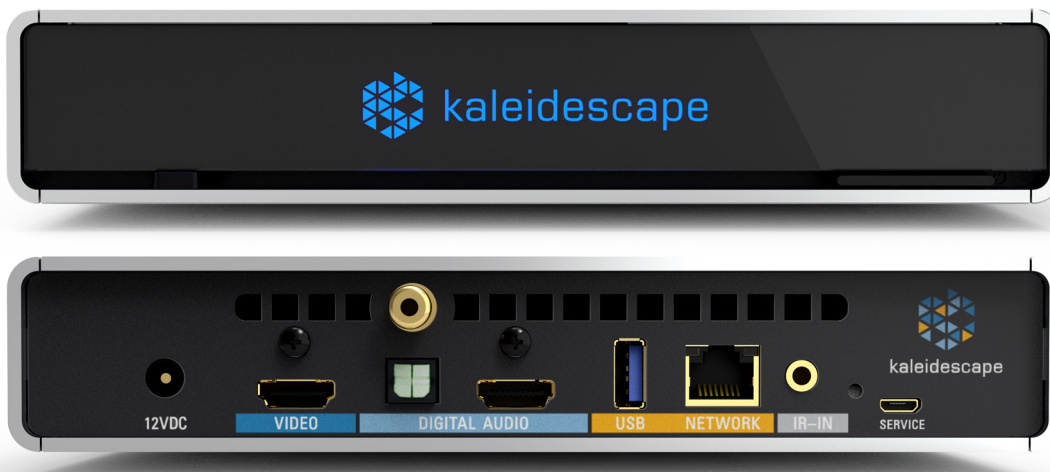

Kaleidescape Strato C combines all of the color and crisp detail of true 4K Ultra HD and HDR with stunning sound and the convenience of Internet delivery.

Kaleidescape designed the Strato C movie player to provide an immersive home cinema experience, with better audio and video playback quality than most commercial theaters.

Strato C plays movies in stunning 4K Ultra HD at up to 100 Mbps and 60 frames per second, without any startup delay. Unlike streaming services, each movie is downloaded and stored on a hard drive, on either a Kaleidescape Terra movie server or a Strato S movie player. Strato C also plays HD and SD digital movies in 4K using advanced upscaling algorithms.

Strato C supports lossless multichannel audio and plays high dynamic range movies on televisions and projectors that can process open standard 10-bit HDMI 2.0a HDR. The onscreen user interface is displayed in full 4K Ultra HD at 60 frames per second, resulting in fluid animation and a stunning visual impact. Strato C plays 4K Ultra HD movies from Terra movie servers as well as Strato and Strato S movie players. Strato C can also play HD and SD content from Alto movie players.

The Strato's onscreen display provides access to the Kaleidescape movie store, the world's only online source for movies with full-fidelity audio and video. The movie store offers a library of the finest content from Hollywood's major studios and the largest selection of 4K UHD titles with HDR. Movies are available with lossless multichannel and object-based audio, including Dolby True HD Atmos and DTS:X.
